## Details

## Details

Releases	1 release <a href="#">Show detail</a> ▾
Supported Android devices	10,438 <a href="#">Go to device catalogue</a>
Localisations	86 localisations <a href="#">Show detail</a> ▾
Permissions	6 permissions <a href="#">Show detail</a> ▾
Features	android.hardware.faketouch
Screen layouts	small, normal, large, xlarge
Native platforms	arm64-v8a, armeabi-v7a, x86, x86_64
API levels	30+
Target SDK	36
OpenGL ES versions	0.0+
OpenGL textures	No textures required
Memory page size	Supports 16 KB You may still have errors if your app uses libraries that we couldn't detect, or if your code assumes that a device is using a specific page size. <a href="#">Learn more</a>

## Policies

# SiteSync

SiteSync

The developer has provided this information about how this app collects, shares and handles your data

## Data safety

Here's more information that the developer has provided about the kinds of data that this app may collect and share, and security practices that the app may follow. Data practices may vary based on your app version, use, region and age. [Learn more](#)

### No data shared with third parties

The developer says that this app doesn't share user data with other companies or organisations. [Learn more](#) about how developers declare sharing.

#### Data collected

Data that this app may collect

##### Personal info

Name, Email address, User IDs and Phone number

#### Security practices

##### Data is encrypted in transit

Your data is transferred over a secure connection

##### You can request that data be deleted

The developer provides a way for you to request that your data be deleted

For more information about collected and shared data, see the developer's [privacy policy](#).

## Testing:

Testers

Choose who can access your test. You can select testers using email lists, or Google Groups.

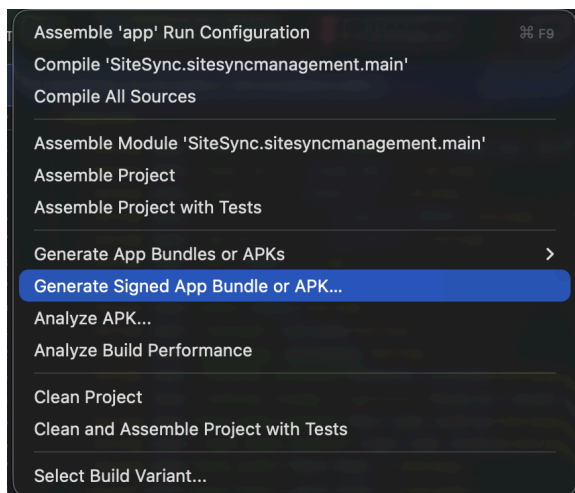

☒ Email lists

## Uploading Actual App

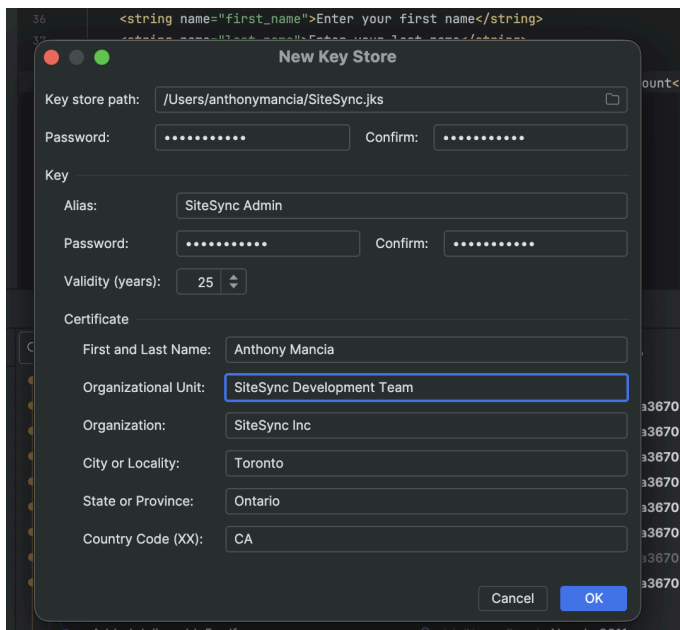

Generate signed app bundle/apk android studio under build

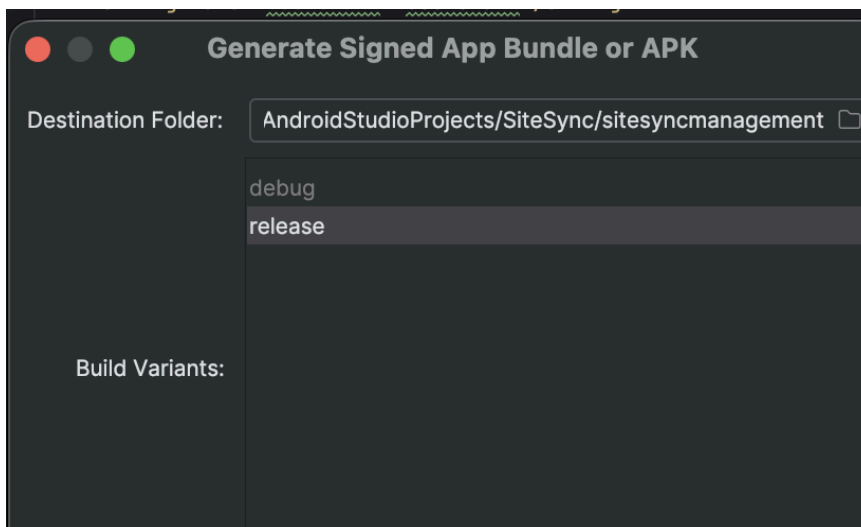

Create a android app bundle

## Create a Key store

Generate a signed build. Choose release if you plan a full release and debug only for testing

Once you get the bundle you can upload it to google testing

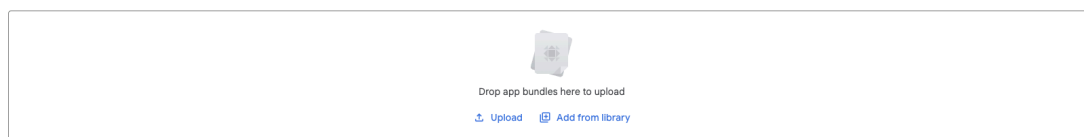

### App integrity

Automatic protection is on - Releases signed by Google Play

App integrity tools help you to ensure that users experience your apps and games the way that you intend

[Manage integrity protection](#) [Change signing key](#)
